

3-Sided Star Ornament

These 3-sided stars can stand on a table, or simply attach a string to make hanging ornaments.

1. Color the stars.
2. Cut out all 3 stars.
3. Fold each star inward along the dotted blue line.
4. Spread glue on just one half of the back side of your first star, then attach it back-to-back to **ONLY ONE** side of the second star (see completed star image).
5. Spread glue to the entire back of the third star and glue it back-to-back to the two star group from step 4, completing the star all the way around.
6. Adjust the folds while the glue is still wet so it looks like the Top View shown above.
